P.O. # (IF APPLICABLE) _____ **Sampled By:** _____

Sample Location	(Substation/PH/PP)				
Sample Date					
Equipment Number					
Bank and Phase					
Serial Number	(Nameplate)				
Manufacturer	(Nameplate)				
Model	(Nameplate)				
Tank/Compartment					
Breathing/Ventilation					
Selector Contact Type					
Transfer Contact Type					
LTC Location					
Tap to Tap Rating					
Current Rating					
Fluid Volume					
Counter					
Oil Filtered/Unit Serviced	(Yes/No)				
Xfrmr Oil Temperature					
LTC Oil Temperature					

All Tests below are Required for TASA Diagnostics	
Dissolved Gas Analysis (IEC-599) Particle Profile Moisture in Oil (IEC-814) Dielectric Breakdown (ASTM D-1816)	Acid Number (IEC-296) Interfacial Tension (ISO-6295) Color (ISO-2049)

Instructions: Please check with your laboratory services provider for preferred sample collection methods. LTCs containing more than 1400 litres of oil require four litres of oil to be flushed through the fill/drain valve prior to collecting samples. LTCs containing less than 1400 litres of oil require one litre of oil to be flushed through the fill/drain valve prior to collecting samples. **PLEASE REMEMBER TO MARK 'TASA SAMPLE' ON SAMPLE CONTAINERS. THANK YOU.**
